Customer Testimonials:

Autodesk Subscription and Asset Management

We had just started working with Rational Technology Inc. when I asked about purchasing additional licenses of AutoCAD Civil 3D. The RTI representative asked several questions about our license history and our use of other design software. He suggested we have Autodesk perform a serial number search which uncovered several AutoCAD licenses that had not been used and were available for upgrade purchases. He also suggested a competitive upgrade of an older version of Microstation for an even bigger savings. Because of the extra time and effort our RTI representative used to investigate our unique situation, he was able to approve the purchase of two additional licenses at a significant discount through the Autodesk upgrade program and the competitive upgrade program. I enjoy working with a representative that is willing to put forth the extra effort to save us money and alleviate stress. We appreciate the conscientious manner with which RTI conducts business.

Kathryn A Kenison, IT Manager
Pioneer Technical Services Inc, Butte Montana

Technical Support

Rational Technology inc. (RTI) is the BEST Autodesk Reseller I've ever worked with in the 20 years I have been a CAD Tech. Their service is ALWAYS with a smile, they do their darndest to provide anything you require, within reason and have always tried to get us the best, most economical deal for our purposes.

Debbie Ottinger, Professional Consultants, Inc. Missoula MT

Implementation Services for AutoCAD Civil 3D

I thought the course (Customized Civil 3D) was great, I learned a lot and feel like I could use the software on my own now.

Lisa Walton, Great West Engineering, Helena Montana
Customized AutoCAD Civil 3D Essentials

This (Customized Civil 3D) met our expectations of getting this info to all different groups-surveyors, drafters, designers - Alex put in much prep time to tailor the class to our company and it's specific needs. I think even those more versed in C3D learned new and usable info.

Customer Testimonials:

Implementation Services for AutoCAD Civil 3D

Good overall. Well organized.

Tim Blankenship - James A. Sewell & Associates, Newport Washington
Customized AutoCAD Civil 3D Essentials

Very good! It fit our needs to make the move to Civil 3D.

Bret Anderson - Great West Engineering, Helena, MT
Customized AutoCAD Civil 3D Essentials

I Thought class [was] a lot better than the one through [our previous Autodesk Reseller].

Ben - Great West Engineers, Inc, Helena Montana
Customized AutoCAD Civil 3D Essentials

Put Together well & covered lots of information in an efficient manner. Very good course!

Corey Allard - JA Sewell, Sandpoint Idaho
Customized AutoCAD Civil 3D Essentials

Course was very well organized and learned tons of material.

Chris C., EarthTech, Calgary, Alberta
Customized AutoCAD Civil 3D Essentials

Having Alex re-engineer our own project was a great teaching tool.

Bryan Rickert - Stahly Engineering & Associates

Customized AutoCAD Civil 3D 2008

Map 3D Implementation for the Mining industry

Using [our] Mine data was helpful - Made the course more appropriate [for what we do].

Scott Rexert - Powder River Coal Company - Caballo Mine, Gillette Wyoming
Customized AutoCAD Map 3D

Autodesk Asset Management Services

We have benefitted from Rational Technology's expertise as our CAD reseller for many years. This time included a period of rapid growth in our company, acquisition of another firm and expansion to multiple office locations. Throughout, Rational Technology was extremely helpful as we forecast our needs, consolidated existing software licenses and tracked our Autodesk assets. Most importantly, Rational Technology showed us ways to maximize these assets and ultimately we enjoyed significant savings. We appreciate the professional advice and assistance we receive from RTI.

What People Are Saying About Us

Customer Testimonials:

Implementation Services for AutoCAD Civil 3D

We knew designing in Civil 3D was going to be completely different than the process we used with Autodesk Land Desktop. We'd had several staff members in different offices working on a Civil 3D template but it was hard to coordinate efforts and keep up with projects.

RTI came on site, evaluated our Civil 3D template and worked with one point of contact in our organization to complete our template allowing us to keep up with project deadlines. RTI scheduled a class for our team using their mobile lab with our company template and data from a project we had completed using Land Desktop that everybody on our team was familiar with.

We found their project-based class to be much more effective than classes we'd taken in the past and with their post-class support we are confident we can fully adopt Civil 3D and increase our productivity with the powerful new tools in Civil 3D."

Sean Haggerty, Sunrise Engineering

Map 3D Data Integration Services for the Telecommunications Industry

Rational Technology Inc (RTI) provided an on-site update class for us on core ACAD 2008 to 2009 functionality and an on site assessment of how we use Map 3D to access internal and external data. RTI demonstrated how by utilizing tools in Map 3D we could access data we store in a proprietary database. With their assistance we were able to identify many ways to improve our processes by linking our plant to our customer information and integrating external data sources.

3 Rivers Communications, a Montana Telephone Cooperative

Migration Services from Eagle Point to Civil 3D

Coming from an Eagle Point platform using AutoCAD 2004 we knew we would face challenges adopting Autodesk's AutoCAD Civil 3D. We solicited bids from several vendors. Representatives from Rational Technology Inc. (RTI) came to us and described their project based concept to our team. They demonstrated strong product knowledge and asked questions to better understand our design process. We chose them based on their structured, project based approach. RTI helped us develop our Civil 3D template and incorporated data for a series of classes from a project we had completed with Eagle Point. With their continued training support we feel our implementation will be successful with minimal disruptions to our productivity.
